

# NUNTIUS

A film by Jori Hulkkonen and Jimi Tenor

A 60 min film starring the Finnish futurist actor Mr Normall. Film is exclusively shown with live sound performed by electronic music maestros Jimi Tenor and Jori Hulkkonen. This film is an event that one must experience live in person. One cannot stream it or watch in YouTube.

Nuntius is a futuristic road-movie, shot in 2014 around Finland. In the spirit of Godard the film didn't have a script and the story came about via improvisation.

Nuntius is in effect a silent movie. Tenor and Hulkkonen were inspired by silent films such as Chien D'Andalou, Nosferatu and Metropolis. Other inspirations from more modern film making would be Eisenstein's Ivan the Terrible, Tarkovski's Solaris and Kubrik's Space Odyssey 2001.

Nuntius is one man's journey from one dimension to another and back. Mr Normall is sent on a mission to find something from earth and bring it back to his home. Nuntius is a visual poem accompanied by electronic music.
